Associate Dean for Scientific Affairs

Dear Dale:

Thanks for passing on the Report of the Faculty Code Procedures Task Force. I've made trivial notes re: the Scientific Misconduct section. I applaud a number of the recommendations. I have also enclosed a copy of an outline by Andy Schaffer (who will give a lecture in our "Integrity" series) that addresses burden of proof by the complainant, and rights of the accused, and the "Guidelines" from the University of Illinois identifying a RSO (Research Standards Officer) - similar to the official suggested by the task force.

Best wishes.
